

Multiple parton interactions in ultradense nuclear matter

- **Dynamical generation** of parton mass in the nuclear chromo-magnetic field

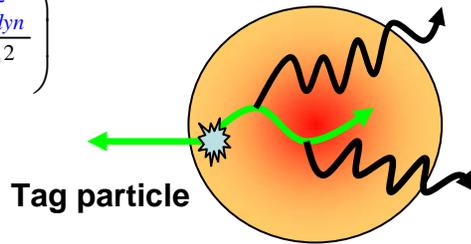

$$x_B \rightarrow x_B \left(1 + \frac{\xi^2 (A^{1/3} - 1)}{Q^2} \right) = x_B \left(1 + \frac{m_{dyn}^2}{Q^2} \right)$$

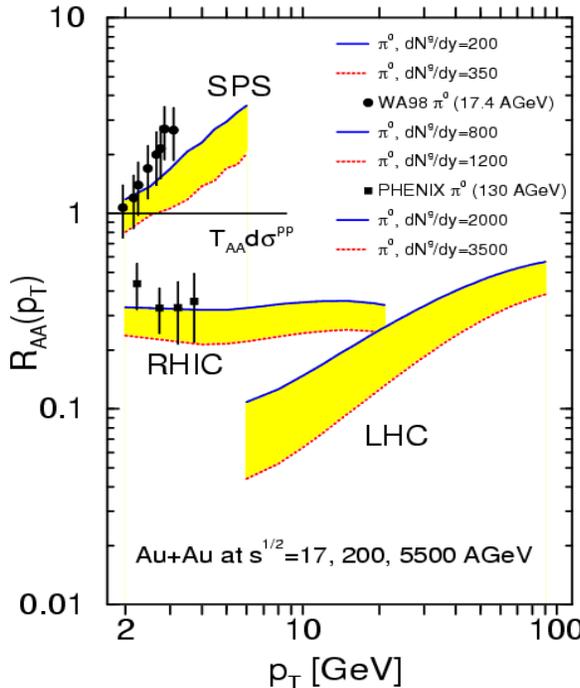

J.W.Qiu and I.Vitev,
Phys.Rev.Lett. 93 (2004)

- **Large parton energy loss** in a quark-gluon plasma of extreme density

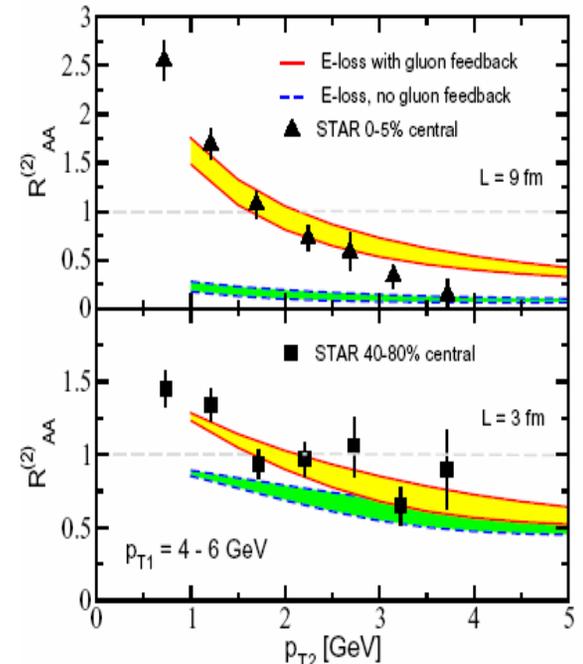

$$\Delta E \propto \alpha_s^3 \int_0^L \rho(z) z dz = \alpha_s^3 \rho_{plasma} L^2$$

- **Redistribution** of E of a fast particle in many large angle and low energy particles

I.Vitev and M. Gyulassy,
Phys.Rev.Lett. 89 (2002)
